PROFESSIONAL SUMMARY

Information Systems graduate and IT Specialist with hands-on experience building full-stack business systems for payroll, employee management, receivables, and transaction tracking. Proficient in PHP, JavaScript, React, and MySQL, with a strong focus on turning real business and administrative workflows into reliable, user-friendly software. Also experienced in day-to-day IT support, system maintenance, and process automation.

EDUCATION

West Visayas State University — Iloilo City, Philippines **August 2025**
Bachelor of Science in Information Systems, Major in Business Application Development

WORK EXPERIENCE

Multipliers Corp. & Meritoni Corp. **January 2026 – Present**
IT Specialist — *Red Spaces Dunggon B, Iloilo City, Philippines*

- Design, develop, and maintain a Payroll and Employee Management System (PHP, JavaScript, MySQL) that automates payroll computation, employee records, and report generation.
- Support HR operations by building and maintaining system features and automating manual processes.
- Provide IT support, troubleshooting, and technical assistance to keep internal operations running smoothly.

PROJECTS

Payroll and Employee Management System — Internship

- Developed to streamline HR processes by automating payroll calculations, centralizing employee data, and generating reports that improve departmental workflow.

CSO Accreditation and Performance Evaluation System — Capstone, Department of Agriculture Region 6

- Built a web-based system to streamline the accreditation and performance evaluation of Civil Society Organizations (CSOs), centralizing document management, project monitoring, and performance ranking to improve efficiency, transparency, and communication.

Medrep — Daily Transaction & Cash-Out Management System

- Developed a PHP/MySQL web application to track daily transactions, including deposits, cash-outs, and inter-employee transfers, with searchable records and monthly summary reports.

Receivables and Payables System

- Developed a web-based system to track receivables and payables per company, with an inline-editable ledger, automatic balance and aging computation, search, and CSV/XLSX export.

Service Charge System

- Developed a system to manage and track service charge distribution.

Accounting System

- Developed a system supporting core accounting and record-keeping functions.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, HTML, CSS, SQL
- **Frameworks & Libraries:** React
- **Databases:** MySQL, PostgreSQL, Supabase
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, Vercel, Hostinger, Microsoft Office
- **Business Systems:** Payroll, HR and employee management, receivables, accounting, transaction tracking
- **UX/UI Design:** User-friendly, responsive interface design focused on usability and functionality
